THE LAST APPARITION goes well beyond the basics of what author Wayne Weible calls the most important event happening in the world today--the ongoing daily apparitions of the Blessed Virgin Mary to six chosen visionaries in the little village of Medjugorje in Bosnia-Herzegovina. It is packed with vital new information in addition to the basic story of its beginnings and where it is today. Included is startling commentary on the alleged secrets and how they will change

the world forever. Underlying the story is the disclosure by the Mother of Jesus that she will never come to earth again in apparition. THE LAST APPARITION is a must read!

A media archaeology that traces connections between new media technologies and distinct cultural realms, considering topics that range from Kant's philosophy to somnambulist clairvoyants. Drawing together literature, media, and philosophy, *Ghostly Apparitions* provides a new model for media archaeology. Stefan Andriopoulos examines the relationships between new media technologies and distinct cultural realms, tracing connections between Kant's philosophy and the magic lantern's phantasmagoria, the Gothic novel and print culture, and spiritualist research and the invention of television. As Kant was writing about the possibility of spiritual apparitions, the emerging medium of the phantasmagoria used hidden magic lanterns to terrify audiences with ghostly projections. Andriopoulos juxtaposes the philosophical arguments of German idealism with contemporaneous occultism and ghost shows. In close readings of Kant, Hegel, and Schopenhauer, he traces the diverging ways in which these authors appropriate optical media effects and spiritualist notions. The spectral apparitions from this period also intersect with an exploding print market and the rise of immersive reading practices. Andriopoulos

explores the circulation of ostensibly genuine ghost narratives and Gothic fiction, which was said to produce “reading addiction” and a loss of reality. Romantic representations of animal magnetism and clairvoyance similarly blurred the boundary between fiction and reality. In the 1840s, Edgar Allan Poe adapted a German case history that described a magnetic clairvoyant as arrested in the moment of dying. Yet even though Poe's tale belonged to the realm of literary fiction, it was reprinted as an authentic news item. Andriopoulos extends this archaeology of new media into the early twentieth century. Tracing a reciprocal interaction between occultism and engineering, he reveals how spiritualist research into the psychic “television” of somnambulist clairvoyants enabled the concurrent emergence of the technical medium.

* Co-winner of the tenth annual James S. Donnelly, Sr. award for Books in History and the Social Sciences presented by the American Conference for Irish Studies (ACIS) In 1879, local people reported an apparition of the Virgin Mary and other supernatural personages at Knock, a poor rural village in western Ireland. The author draws on both insiders' views and his training as a sociologist to show how the apparition was related to the local social context including economic, cultural, religious, political and historical dimensions. Drawing on new and neglected sources of evidence, Hynes pays particular attention to the individuals most directly involved including the seers, local clergy, Land League activists, various promoters, and others. author looks through participants' eyes as much as possible. To understand what those eyes saw, the book examines the local scene for half a century before the apparition. His deep knowledge of the local context enables the author to develop understandings of key persons and events before and around the apparition. Using the Knock case, the author challenges usually accepted explanations of changes in nineteenth-century Irish Catholicism. The book is important for those interested in the links between official and local religion especially in Irish Catholicism, for students of apparitions generally, for anyone interested in bottom-up approaches to social and cultural history, and especially for students of nineteenth-century Ireland.

How does Derrida write of and on the other? *Apparitions* examines exemplary instances of the relation to the other—the relation of Moses to God, Derrida's friendship with Jean-Luc Nancy, Derrida's relation to a recently departed actress caught on video—to demonstrate how Derrida forces us to reconceive who or what the other may be. For Derrida, the singularity of the other includes not only the formal or logical sense of alterity, the otherness of the human other, but also the otherness of the nonliving, the no longer living, or the not yet alive. Addressing Derrida's readings of Husserl, Levin.

Apparitions takes a new look at the critical legacy of one of the 20th century's most important and influential thinkers about music, Theodor W. Adorno. Bringing together an international group of scholars, the book offers new historical and critical insights into Adorno's theories of music and how these theories, in turn, have affected the study of contemporary art music, popular music, and jazz.
